

CARBON-X (Organic Carbon)

COMPOSITION (%W/W)

Liquid Organic Carbon	40.00
Aqua Media	Q.S.

Liquid CARBON promotes soil structure and gives physical stability. Organic carbon improves soil aeration (Oxygen in the soil) holding capacity of water and thereby reduce the risk of soil erosion and nutrients. Carbon-X enrich soil micro-organisms who helps in binding soil particles. Bacteria excretions, root exudates, fungal hyphae, etc. can all contribute to better soil structure.

DOSAGE & METHOD OF USE

FOLIAR

CROP

Fruit
Horticultural
Floricultural

APPLICATION

2-4 Throughout
the plant cycle

DOSE

2 -3 ml / 1 L

1 L / acre
for Drip

FERTIGATION

- 20 L per acre per year

FORMULATIONS

Liquid

PACKAGE

1Ltr.,

5 Ltr.
