

MAX-PRO
(Growth Promoter)

COMPOSITION (%W/W)

High protein nano particles.	00.00*
Aqua Media	Q.S.

MAX-PRO is beneficial for various fruits and vegetables, particularly in the stages of flower and fruit setting. In Pomegranate, Max-pro reduces double flower ratio, prevents dropping of buds/ female flowers and increases flower to fruit conversion ratio. In Grapes, improves berry setting and reduces flower & immature berry drop. In Vegetables (Chilli, Tomato & Capsicum etc.) it serves the similar benefits.
