

## Organic Product

Silicon

### **MAX-GREEN**

(Fertilizer)

#### COMPOSITION (%W/W)

Potassium Silicate 40%	65.00
Neutralizers	35.00

**MAX-GREEN** contains Silicon and is a very important and useful ingredient for the plants. Silicon improves nutrition and growth of plants and increase productivity. To use silica most effectively, your plants need to take it up through their roots, not through their leaves. When the silica is in your growing environment, it's right within roots' reach. Simply shake well and add it to your nutrient mix grow media during the bloom phase.

#### DOSAGE & METHOD OF USE

	CROP	APPLICATION	DOSE
FOLIAR	Fruit Horticultural Floricultural	2-4 Throughout the plant cycle	500gm to 1 Kg / Acre
FERTIGATION	--		

#### FORMULATIONS

Granular

#### PACKAGE

5 Kg.
