

SOIL ENRICHER

(Organic Fertilizer)

COMPOSITION (%W/W)

Fish meal	00.00*
Neem (Azadirachta indica) Cake	00.00*
Karanj (Millettia pinnata) Cake	00.00*
Compost	00.00*

SOIL ENRICHER increases organic carbon and humas in the soil and improves porosity of soil. It also helps reduce salts and thereby increase the beneficial bacterial activities. It improves soil structure, texture and aeration increasing the soil's water retention abilities and stimulating healthy root development. Ultimately balances soil ecosystem.

DOSAGE & METHOD OF USE

	CROP	APPLICATION	DOSE
FOLIAR			
FERTIGATION	Fruit Horticultural Floricultural All Field crops.	1-2 Throughout the plant cycle	200 Kg to 280 Kg / Acre
